

Sure Bet Program Summary

Energy Efficiency Incentives for Commercial Customers

NV Energy's Sure Bet Program offers cash incentives and technical assistance to commercial customers to help them improve energy efficiency and save money on their utility bills.

Flexible Program Makes Efficiency Easier

Customers can select a project from a prescriptive list of measures or propose a custom project with verifiable energy savings.

- Program staff can identify opportunities for improving energy efficiency and assist in identifying contractors.
- Prescriptive measures include lighting equipment and controls, refrigeration and commercial kitchen measures, set-back thermostats, variable speed drives, vending misers, motors and more.
- Incentives are available for new construction, major renovation and existing facility project improvements.

Boost Your Bottom Line

Since energy costs are the largest and most controllable operating expense for most businesses, every dollar saved can make a big impact on your bottom line.

- Adding controls to vending machines is quick, easy and can cut the machine's energy use by as much as one-half.
- NEMA Premium motors are 1 percent to 3.5 percent more efficient than standard motors. Since the operating cost of a motor far exceeds its purchase price, the increased efficiency can make a big impact on costs.
- Overhead T5 and T8 fluorescent lamps with electronic ballasts use 57 percent less energy than standard T12 lamps with magnetic ballasts.
- High Intensity Discharge (HID) lamps use 75 percent less energy than standard incandescent lamps. Consider for auditoriums, warehouses, gyms, etc.
- A replacement for metal halide or fluorescent systems, induction lighting uses 11 percent less energy and lasts five to 10 times longer.
- LEDs (Light-Emitting Diode) use 65 percent less energy than incandescent lamps and emit even less heat than neon lights.

APPLICATION PROCESS

1. Submit Pre-Notification Application (with required supporting documents) to surebet@nvenergy.com or fax to 702-216-2729.
2. Sure Bet Team conducts pre-inspections as necessary.
3. Funding is reserved for approved projects for 90 days.
4. Projects must be completed within the 90-day reservation period.
5. Submit Project Completion Agreement (with required supporting documents) to surebet@nvenergy.com or fax to 702-216-2729.
6. Sure Bet Team conducts post-inspections as necessary.
7. Incentive check is issued 4 to 6 weeks after NV Energy approval.

Incentives are available on a first-come, first-served basis. All commercial customers located in NV Energy's service territory are eligible.
